## LOGISTICS TECHNOLOGY

UNIQUE TECHNOLOGY SOLUTIONS

Our Burris Logistics Technology team offers solutions that never sleep. Powered by more than 100 talented team members, we work around the clock to deliver appropriate resources designed to address your current and future needs. We pair state-of-the-art technology with solutions that surround every aspect of end-to-end supply chain management. Logistics Technology transforms not only the way we manage time and temperature-sensitive products, but the way we fulfill the needs of our customers.
- Warehouse management software
- Enterprise resource management
- Produce inspection tool
- External integrations
- Supply chain portal
- Demand planning
- Order status
- Delivery status

Technology always looks for a better way. Our customers are the same. That's why we place such emphasis on being able to "Get Like the Customer." Our solutions are tailored to fit the way the customer does business. If there is a need, we will either find it, build it, or integrate with it to take care of our partners' supply chain needs.
